

AI ENGINEERING

Train to be a skilled AI Engineer

PROGRAM OVERVIEW

→ **Saturday Live Classes**
for 6 months

→ **CV Review**

→ **Interview Preparation**

→ **Post-Training Support**

→ **Mentorship Sessions**

→ **Career Pathway Guidance**

→ **2 month internship**

→ **LinkedIn Optimization**

→ **Navigating the Job Market Session**

WHY CONSIDER AI ENGINEERING?

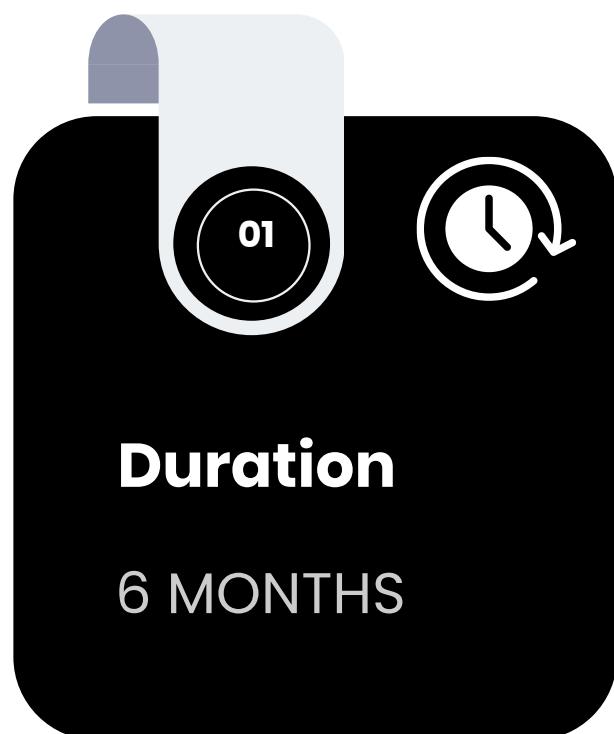

AI Engineering gives you the ability to transform raw computational power into intelligent systems that reason, learn, and act. In today's economy, organizations no longer just need to understand data; they need to build systems that can predict outcomes, automate complex workflows, and solve problems autonomously. This shift has made AI Engineering one of the most critical and high-leverage skill sets in the world.

Learning AI Engineering equips you with the technical mastery to architect, fine-tune, and deploy sophisticated models. You will move beyond simply using AI tools to building them—learning how to integrate "agentic" capabilities into software and bridge the gap between raw code and human-like intelligence. This allows you to turn abstract algorithms into practical applications that drive real-world impact.

Beyond the massive career opportunities, AI Engineering empowers you to tackle humanity's most intricate challenges at scale. It is a future-ready discipline that ensures you remain at the forefront of innovation, giving you the power to not just adapt to a changing world, but to actively engineer it.

REQUIREMENTS

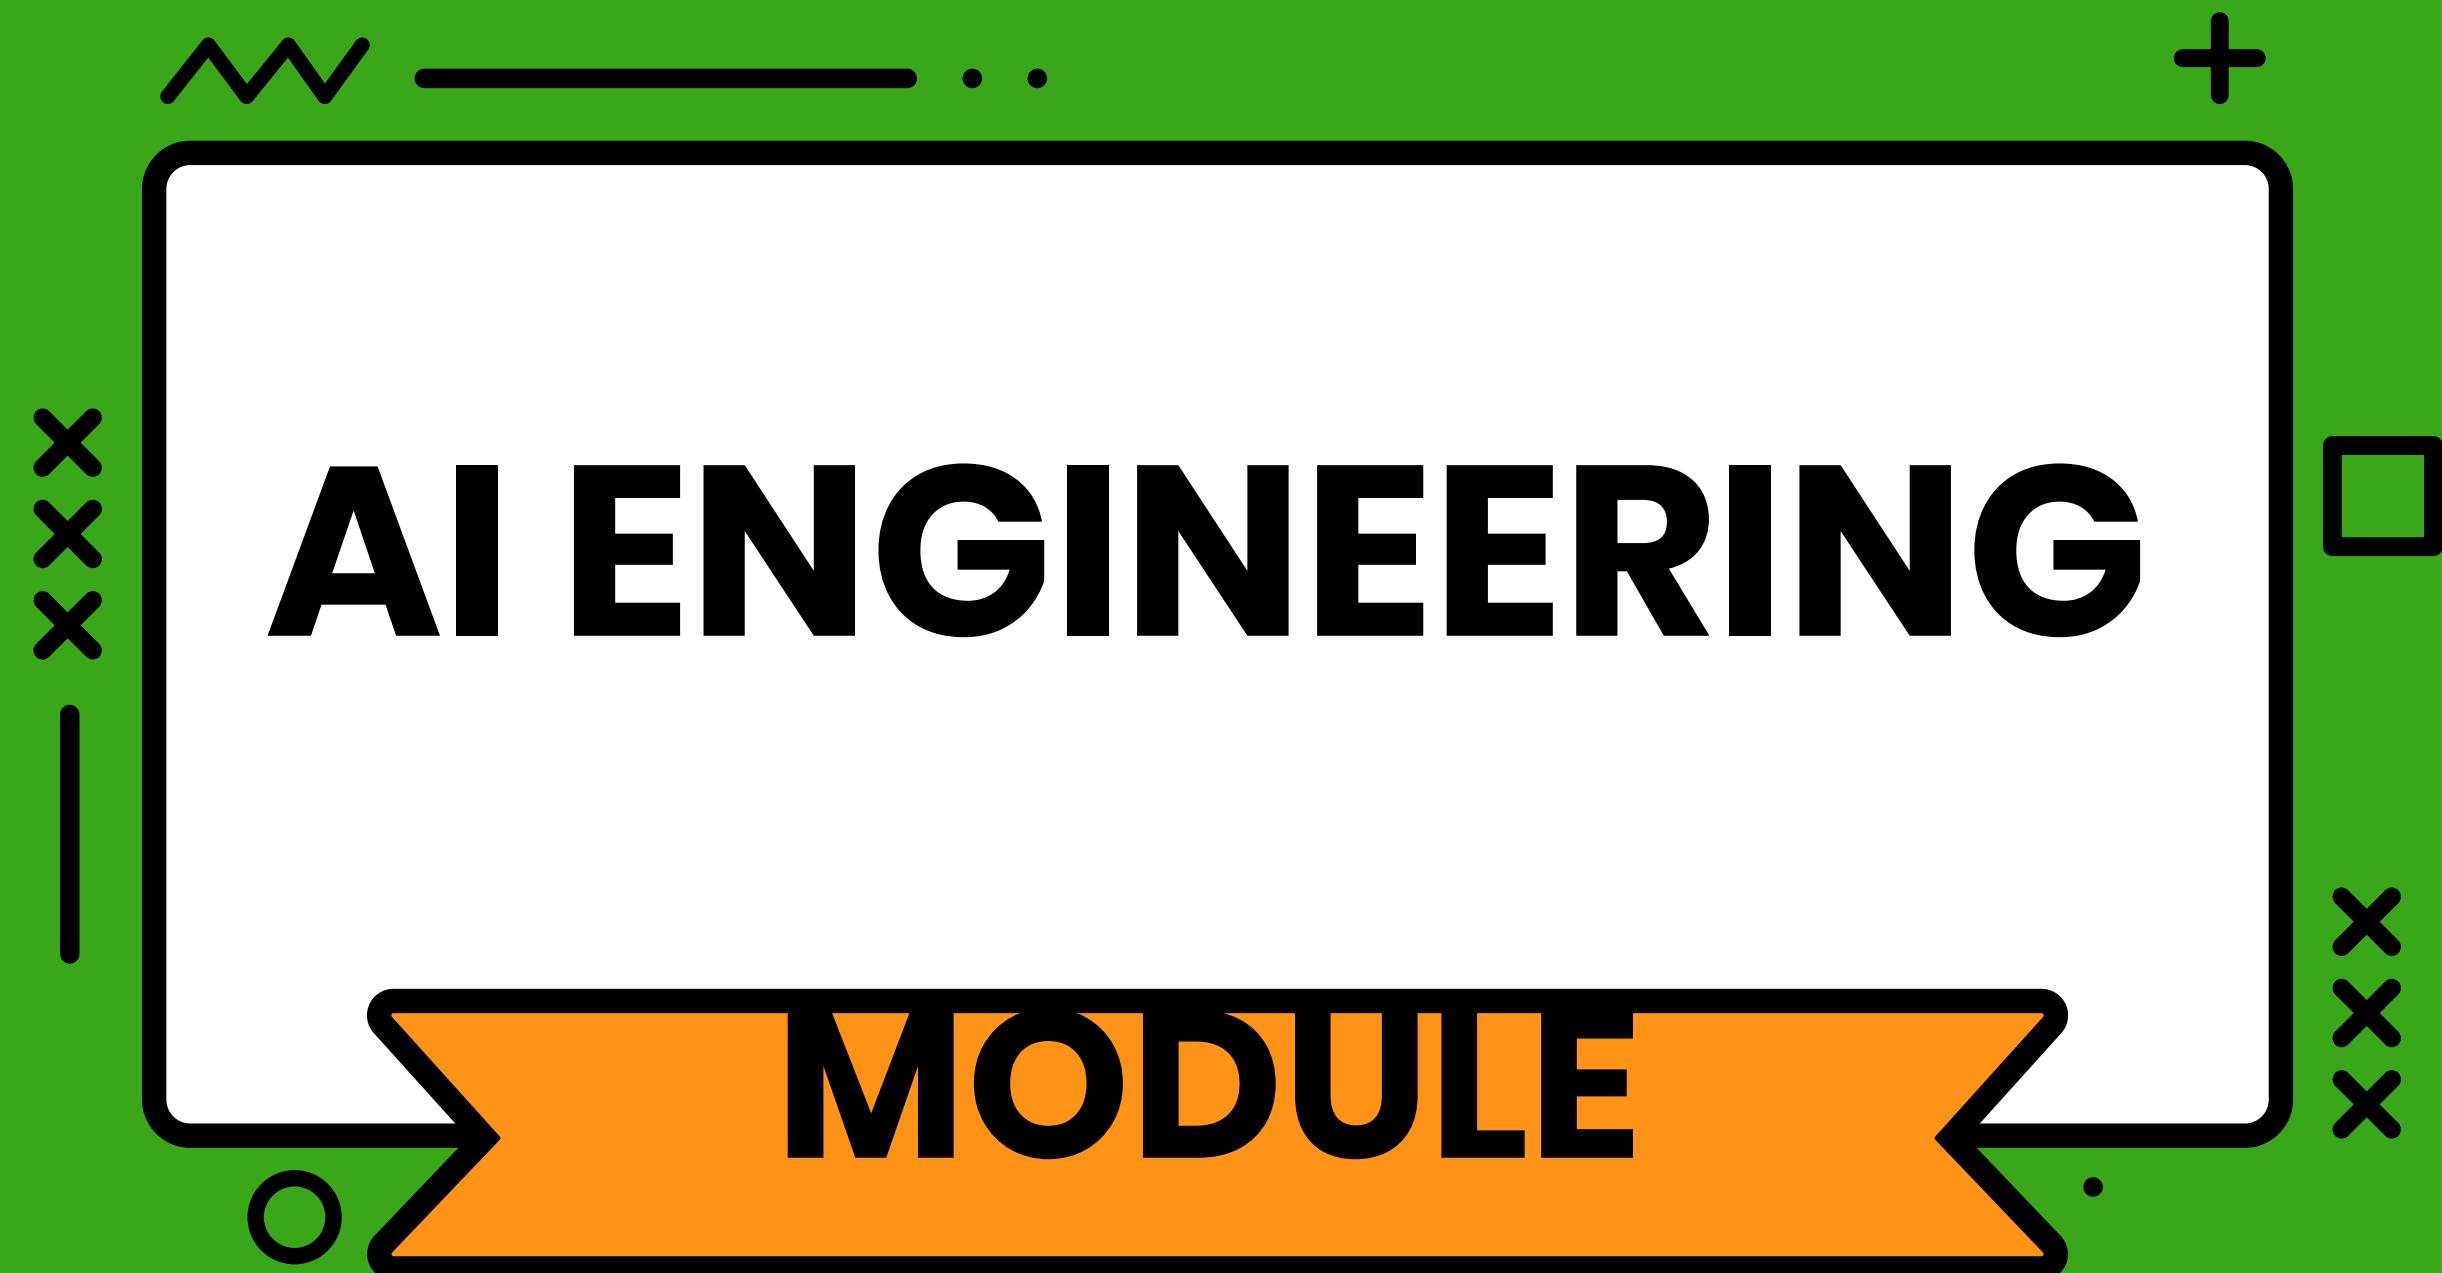

- Don't wait for opportunities; build the skills that make opportunities come looking for you.

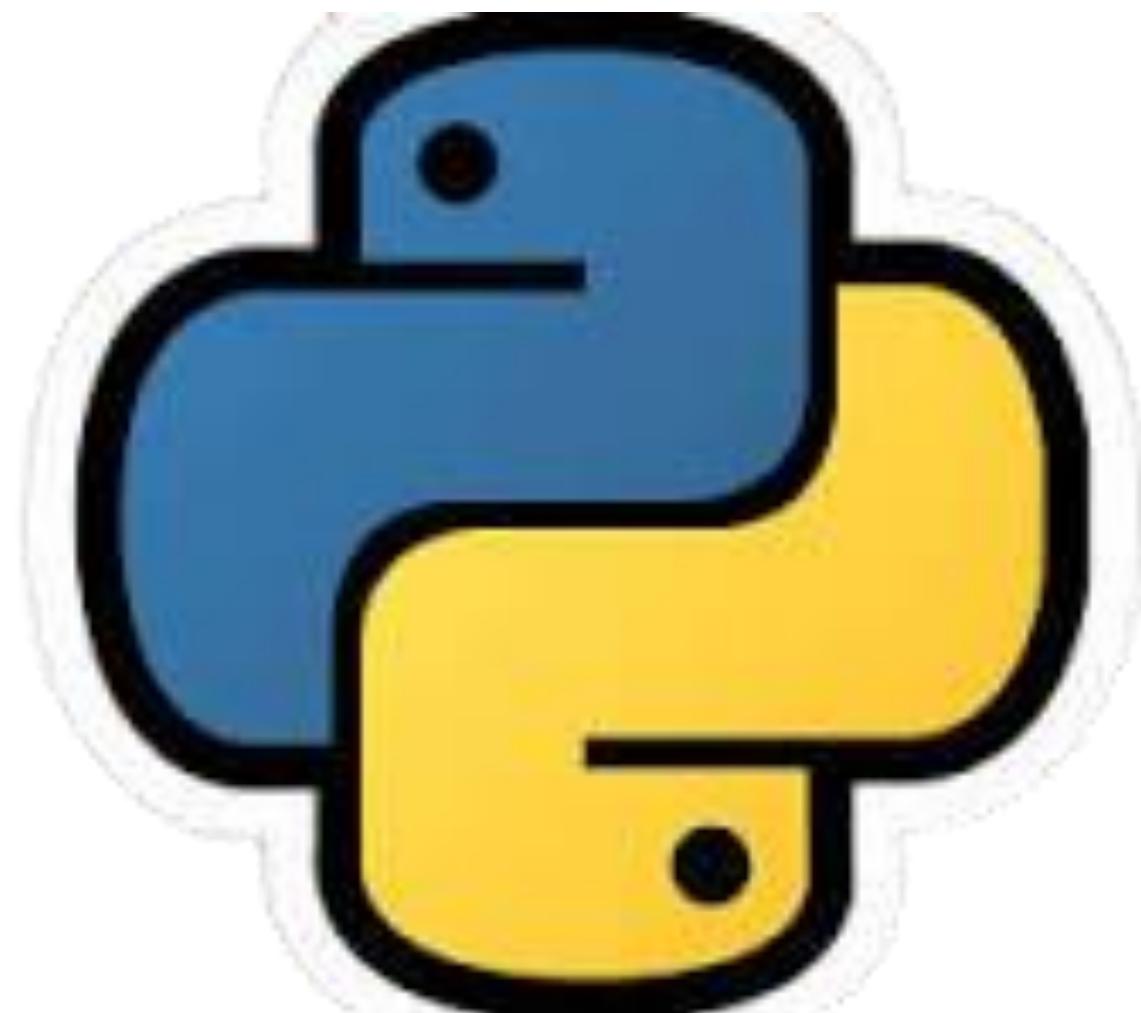

OUR CURRICULUM

AI ENGINEERING

Module 1

Python for AI Engineering (Advanced)

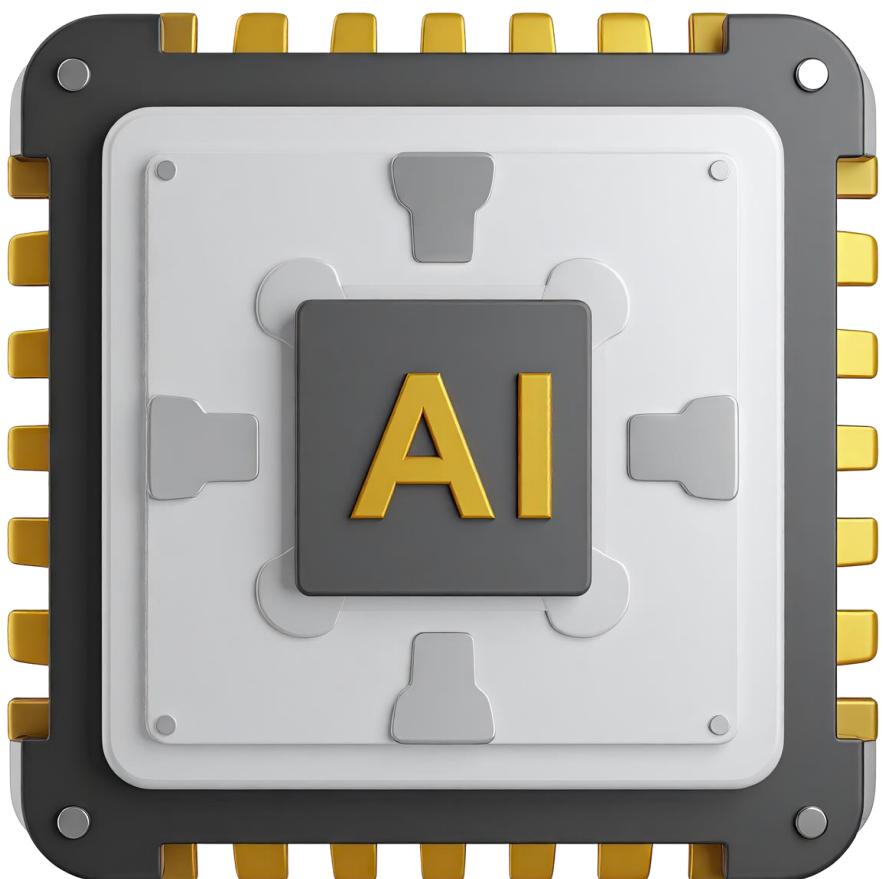

Everything in the Professional Tier **PLUS**:

- Advanced OOP
- Decorators & generators
- Working with APIs
- Logging & error handling
- Python for automation
- Writing production-ready Python scripts

AI ENGINEERING

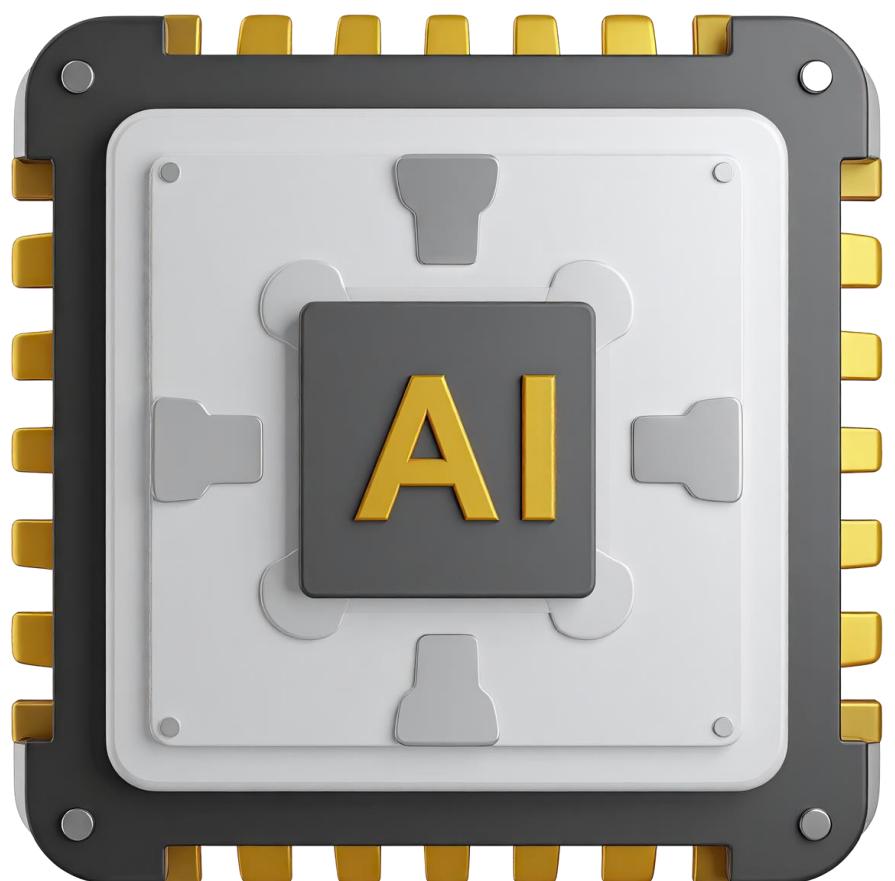

Module 2

Advanced Artificial Intelligence Mathematics

- Vector spaces
- Norms & distance metrics
- Optimization algorithms (SGD, Adam, RMSProp)
- Regularization techniques
- Understanding backpropagation deeply
- Applied math projects for real problems

AI ENGINEERING

Module 3

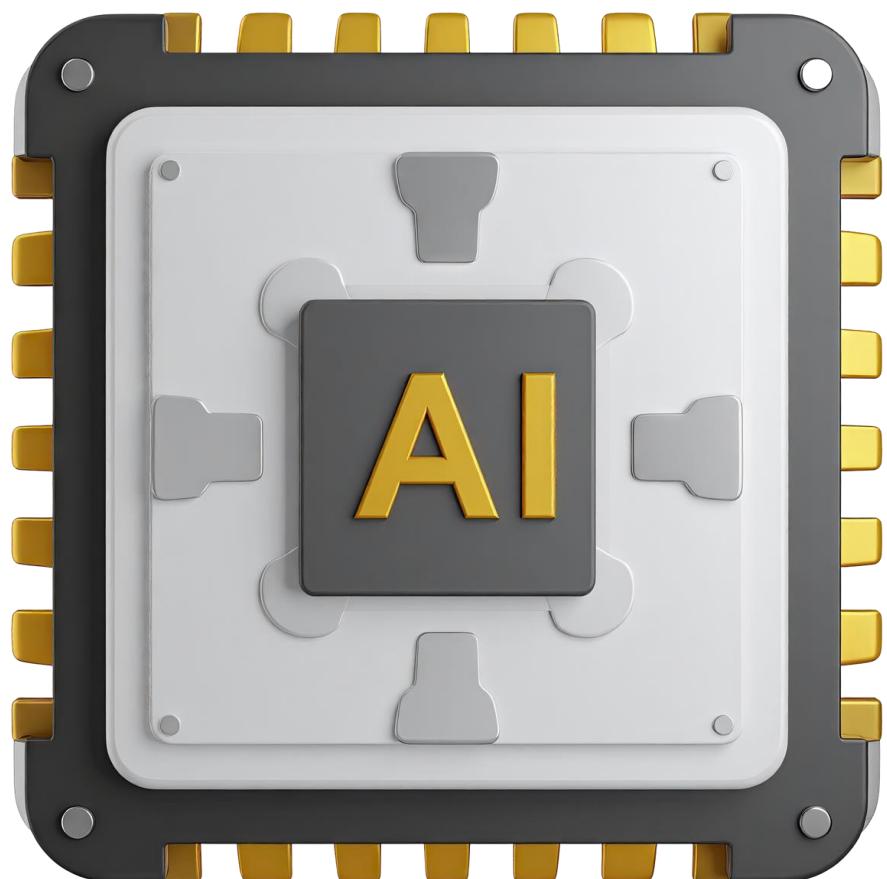

Deep Learning (Advanced)

- Building deep neural networks
- Regularization (dropout, batch norm)
- CNNs in-depth
- Transfer learning
- Model fine-tuning
- Advanced model evaluation
- Deep learning project #1 (vision or NLP)

AI ENGINEERING

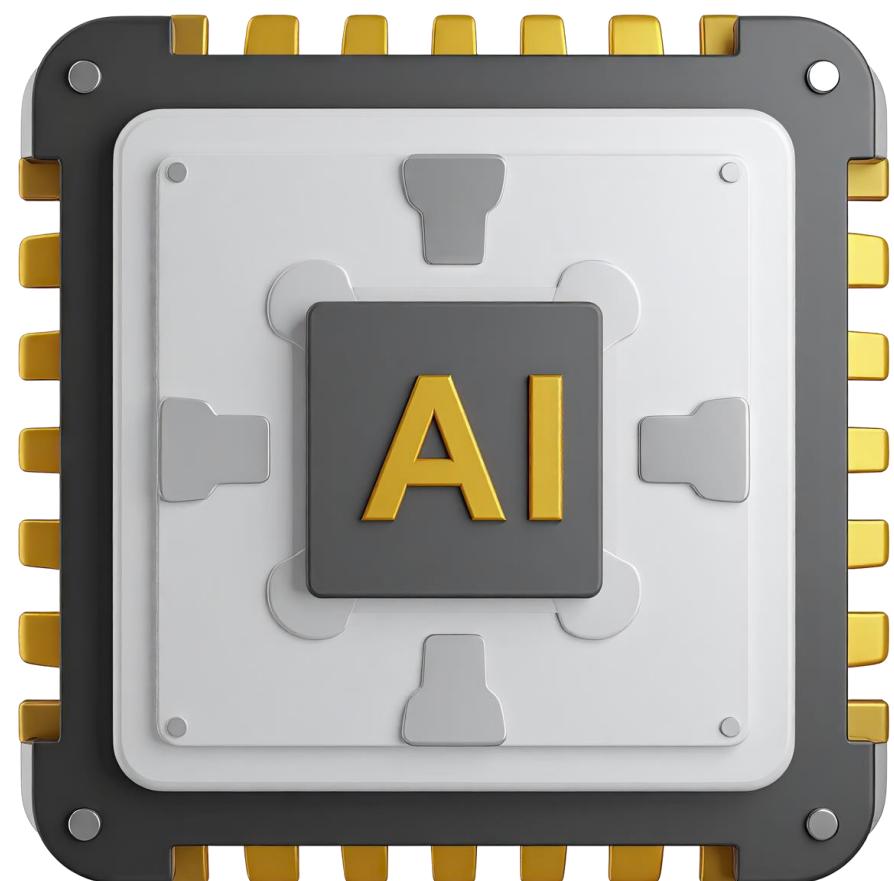

Module 4

Natural Language Processing (Advanced)

- Advanced text preprocessing
- Word embeddings (Word2Vec, GloVe)
- RNNs, LSTMs, GRUs
- Attention mechanisms (intro)
- Text classification & sequence modelling
- NLP project

AI ENGINEERING

Module 5

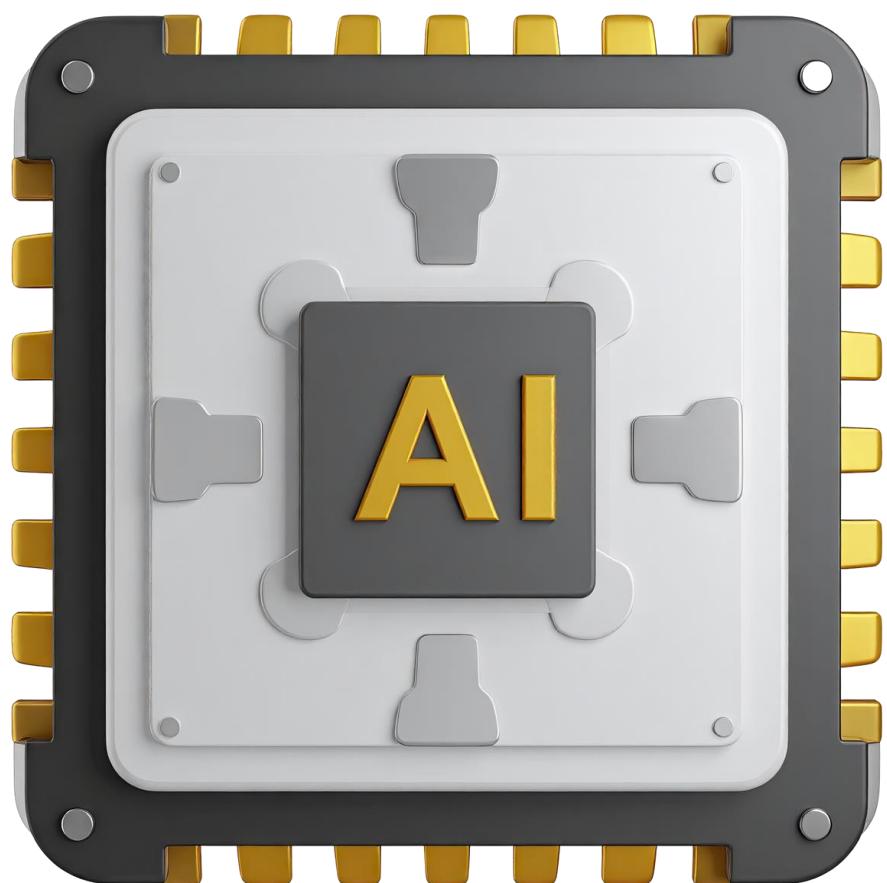

Computer Vision Engineering (Advanced)

- Convolution operations (deep dive)
- Popular architectures: ResNet, MobileNet, EfficientNet
- Image segmentation basics
- Object detection (YOLO, SSD introduction)
- Data augmentation techniques
- Computer vision project

AI ENGINEERING

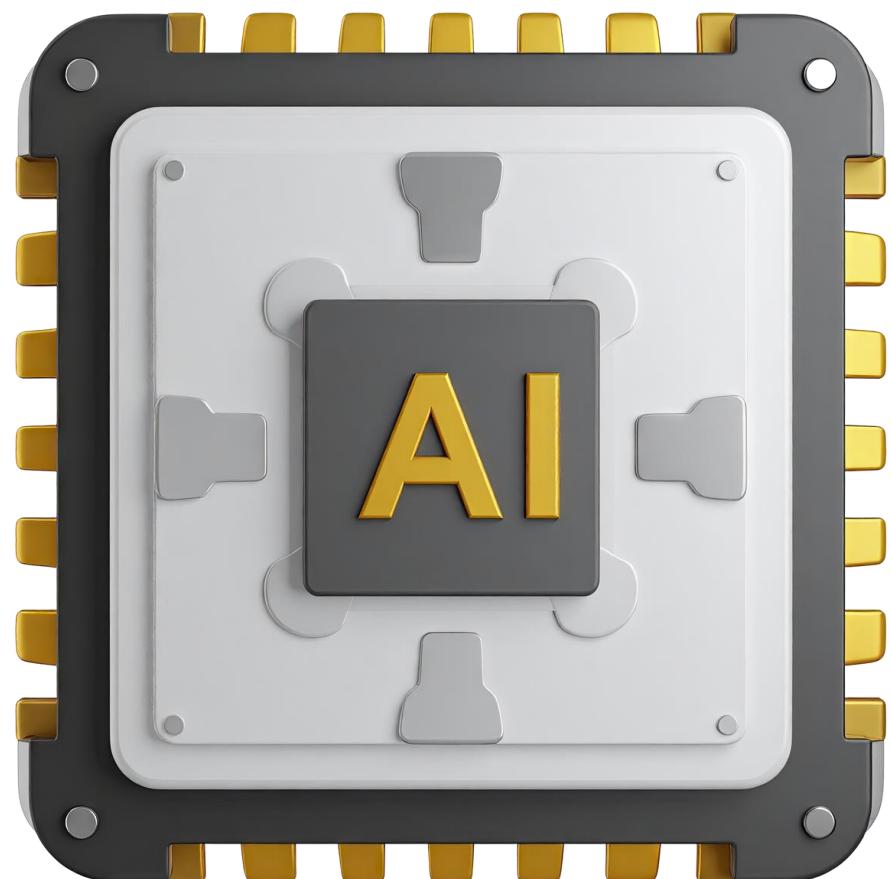

Module 6

Generative AI (Foundations)

- What are Generative Models?
- Autoencoders
- Variational Autoencoders (VAEs)
- Introduction to GANs
- Practical generative AI applications

AI ENGINEERING

Module 7

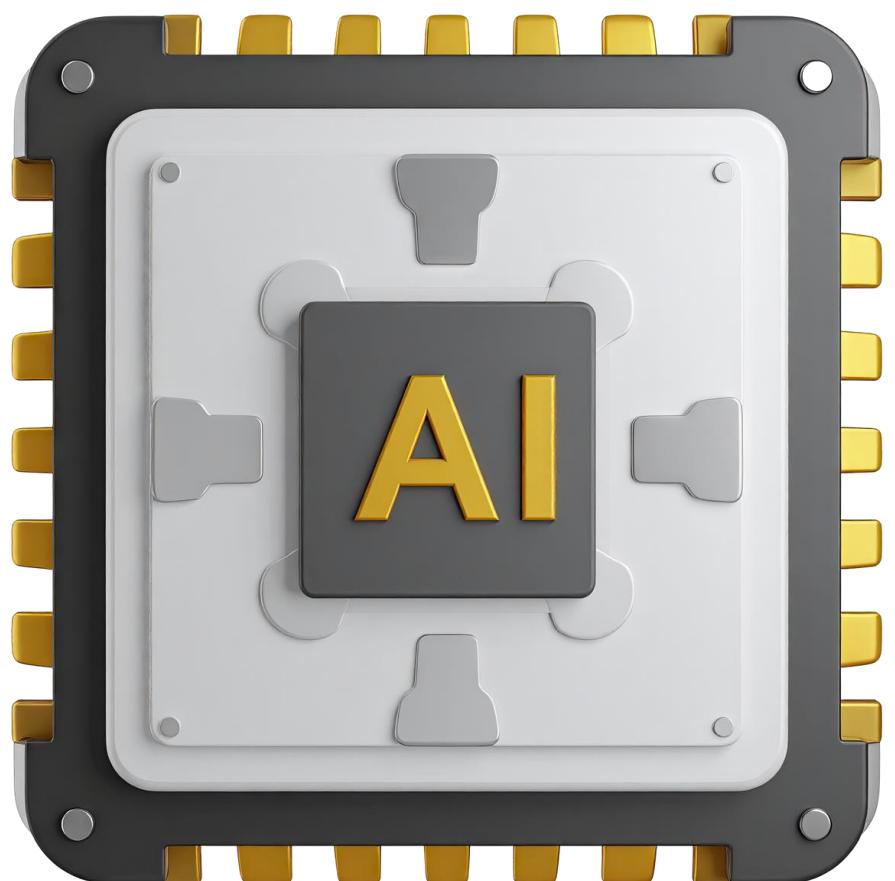

MLOps & Model Deployment (Industry-Focused)

- Saving and exporting AI models
- Model packaging
- Flask & FastAPI for AI deployment
- Docker fundamentals
- Monitoring AI models
- CI/CD pipeline introduction
- Deployment project

AI ENGINEERING

Module 8

Cloud AI Engineering

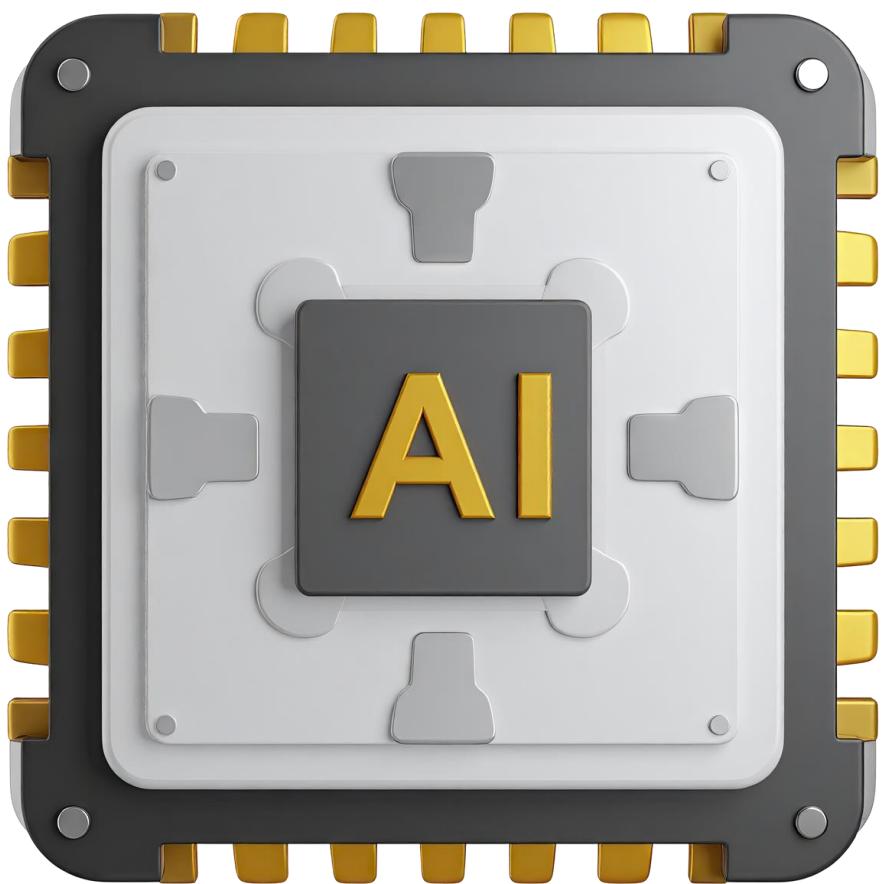

- AWS/GCP/Azure AI tools
- Cloud model hosting (SageMaker intro, Vertex AI)
- Managing scalable AI workflows
- Data pipelines for AI
- Cloud compute scaling (GPUs & accelerators)

AI ENGINEERING

Module 9

Advanced Applied AI Systems

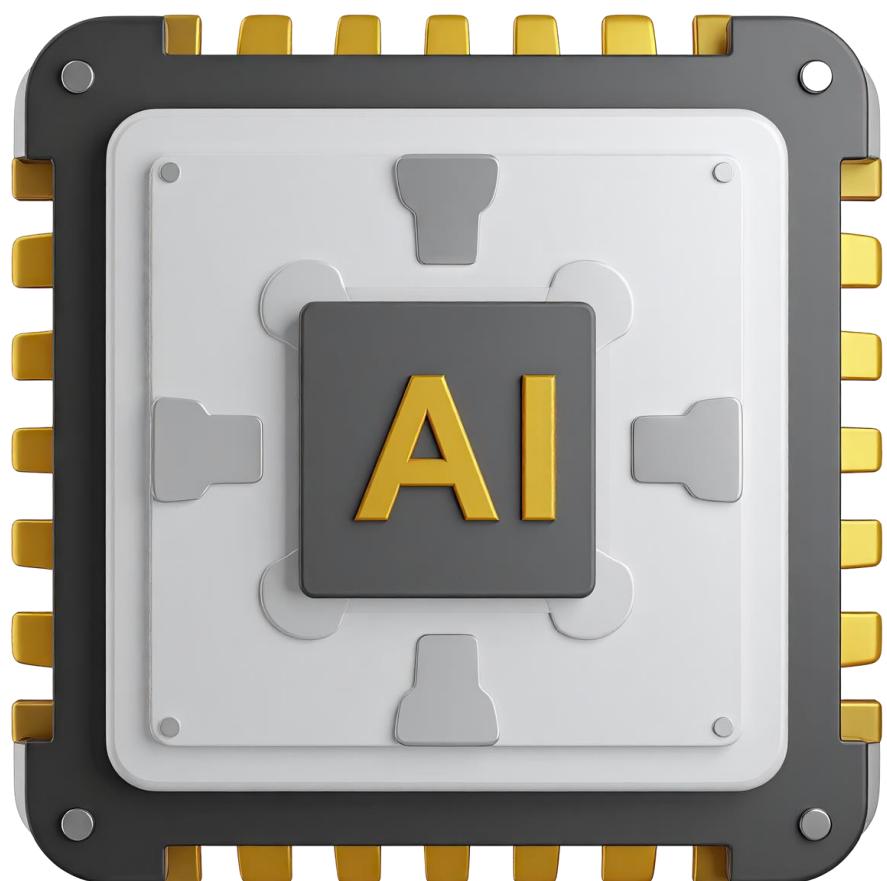

- Recommender systems (intro)
- Time-series forecasting with DL
- Fraud/Anomaly detection
- Real-world AI architectures
- Ethical AI, fairness & bias

AI ENGINEERING

Module 10

AI Engineering Capstone Project (End-to-End System)

- Problem framing
- Data engineering pipeline
- Model development (vision/NLP/tabular)
- Deployment using API or cloud platform
- Technical + business presentation
- Portfolio-ready submission

Industries That Employ AI Engineer

Technology and
Software Companies

Finance and
Banking

Healthcare and
Pharmaceuticals

E-commerce
and Retail

Telecommunications

Manufacturing and
Production

Energy and
Utilities

Government and
Public Sector

Education and
EdTech

Media & Entertainment

WHY TRAIN WITH US?

**Practical, Job
Ready Training**

**Industry-
Standard Tools
& Technologies**

**Expert
Instructors With
Real Experience**

**Personalized
Mentorship &
Support**

**Flexible and
Beginner-Friendly**

**Certification
That Boosts
Your CV**

**Career
Guidance &
Portfolio
Development**

**Supportive
Community**

**Proven Success
Stories**

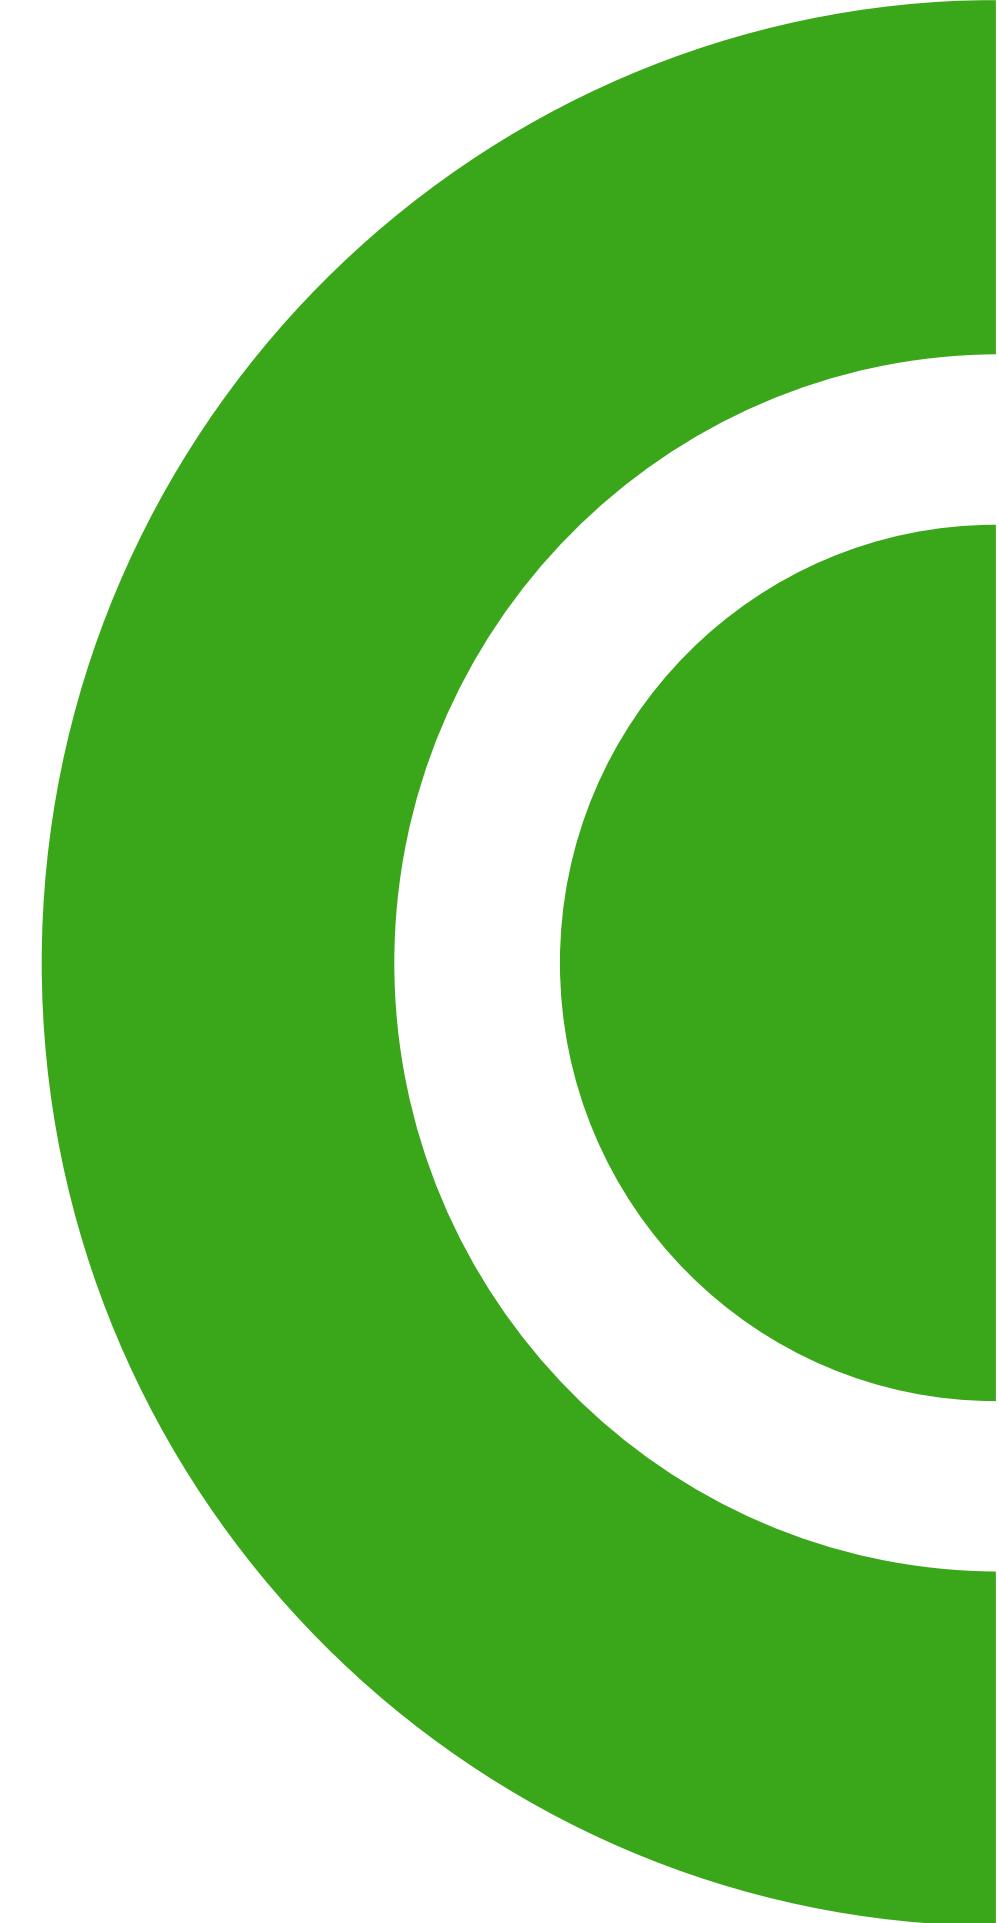

**Affordable
Quality Training**

Real life case studies

Testimonial

The following are genuine testimonials that we have received from our past students who have proven the benefits of the services we have provided to them.

Sodiq

I've attended other online classes before, but Amdor Analytics stands out for me. The facilitator is engaging, the sessions are practical, and the support team is responsive. I feel like I'm part of a real community that wants me to succeed. I'm happy I made this choice

Chinasa Fabian-Ijeruh

Before joining Amdor Analytics, I had no prior tech background. Now, I can confidently analyze data and build reports. The facilitator is very supportive and always encourages us to practice. The training has made me believe that anyone can learn tech if they're in the right environment.

Chidimma Uzochukwu

It's been an eye-opening experience learning at Amdor Analytics. The way the facilitator breaks down each lesson into relatable examples makes learning easy. Even though the pace is fast sometimes, the explanations are clear, and the resources provided are excellent. I'm really grateful for this opportunity.
